Allowable Subject Matter

Claims 1-34 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art fails to teach or suggest a method or apparatus for exciting selected ions in an ion cyclotron resonance system where an applied excitation signal to selected ions includes a fundamental frequency of said selected ions and a further frequency greater than the fundamental frequency which is also a resonant frequency of the selected ions as recited in claims 1, 15, and 27.

Claims 2-14, 16-26, and 28-34 are allowable by virtue of their dependency.

The prior art, such as that laid out in Wells et al. (USPN 5,714,755), shows that the second applied frequency of the excitation signal is always less than a fundamental applied frequency (Col. 11). No teaching can be found in the prior art where a second applied signal contains a resonant frequency greater than the applied fundamental frequency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
